

LAB: Rollback configuration

Topology

Tasks

1. Load the baseline configuration for all devices in the topology.
2. Document the L1, L2 topology to support future troubleshooting tasks.
3. Document the logical (L3) topology to support future troubleshooting tasks.

Task 1

- View contents of a flash

```
ALS1# show flash:
```

```
ALS1# dir flash:/tshoot
```

- View contents of a file

```
ALS1# more flash:/tshoot/Lab31-ALS1-Base-Cfg.txt
```

- Erase configuration

```
ALS1# erase startup-config | write erase
```

- Copy new config

```
Switch# copy flash:/tshoot/Lab31-ALS1-Base-Cfg.txt running-config
```

```
Switch# copy flash:/tshoot/Lab31-ALS1-Base-Cfg.txt  
running-config
```

Task 2

- Useful commands

```
Switch# show cdp neighbors
```

```
Switch# show interfaces trunk
```

```
Switch# show etherchannel summary
```

```
Switch# show interface status
```

```
Switch# show vlan
```

```
Switch# show spanning-tree vlan vlan-id
```

Task 3

- Useful commands

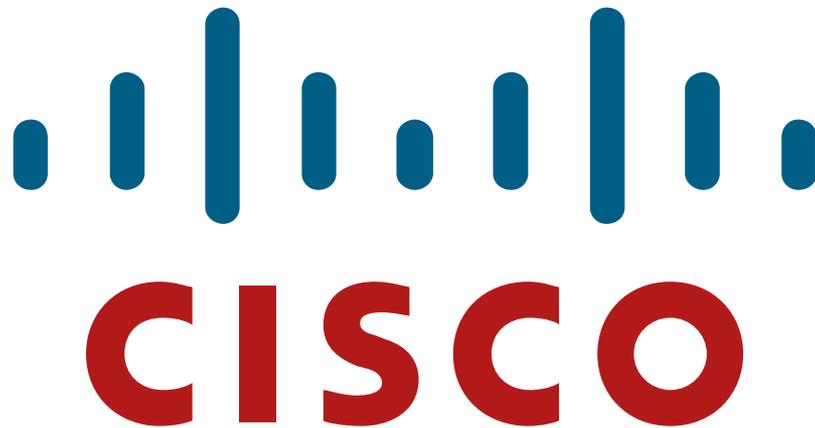

```
Switch# show ip interfaces brief
```

```
Switch# show ip protocols
```

```
Switch# show ip route
```

```
Switch# show standby brief
```

```
C:\> ping ip | tracert ip
```
